

Oreoluwa Oloniyo

Backend Engineer · Node.js · Go · PostgreSQL · AWS · Distributed Systems
Lagos, Nigeria · +234 909 814 0976 · ooluwa27@gmail.com · [linkedin.com/in/oreoluwa-oloniyo](#) · [github.com/babafemi99](#)

SUMMARY

Backend engineer with 6+ years building high-throughput systems in Node.js and Go across fintech, Web3, and ride-hailing. Strong in async programming, RESTful APIs, SQL/NoSQL, AWS, and security-first development. Comfortable leading teams and shipping testable, performant code.

SKILLS

Languages: Node.js, Go, TypeScript, JavaScript, Python	Frameworks: Express.js, chi (Go), REST, gRPC, GraphQL	Databases: PostgreSQL, MongoDB, CockroachDB, Redis
Cloud & Infra: AWS, GCP, Docker, Kubernetes, CI/CD	Messaging: NATS, RabbitMQ, WebSockets	Payments: Paystack, Flutterwave, Moniepoint

EXPERIENCE

Software Engineer · AiBox FULL-TIME	Sep 2023 – Present
- Led server-side architecture using Node.js & Go — collaborating with front-end developers to integrate real-time video components — supporting 100+ ceremonies and 2,000+ daily viewers across federal marriage registries nationwide. - Partnered with cross-functional teams to implement AES asymmetric encryption, achieving 75% fewer vulnerabilities and full regulatory compliance. - Liaised with government stakeholders to drive 40% paperwork reduction, 30% lower manual costs, and 50% usage growth in six months.	
Software Engineer · Sendchamp FULL-TIME	Mar 2022 – Aug 2023
- Collaborated with a team of four to design and deliver a high-performance number-insight API in Node.js — driving a 30% revenue increase. - Implemented automated testing and unit tests — boosting retention 20%, doubling conversions, and curbing fraud by 15%. - Refactored async server-side logic and optimised DB queries — 25% performance improvement across all endpoints.	
Software Engineer · Helixgade Technologies FULL-TIME	Jan 2020 – Mar 2021
- Engineered a scalable video management system with Node.js — designing DB schemas and storage solutions — cutting media processing time by 40%. - Authored and presented technical specs to stakeholders, slashing developer onboarding time by 25%.	
Software Engineer Intern · Adexfe System INTERN	Mar – Oct 2019
- Built RESTful APIs and auth & authorization for a stock trading app — cut unauthorized access by 40%. - Integrated front-end UI components with server-side logic — boosted engagement by 30%.	

PROJECTS

SaroPay SIDE PROJECT	Jan 2024 – Present
Non-custodial crypto payment infra targeting iGaming, import/export & trading desks — 1% fee, instant settlement, multi-chain (Ethereum, Polygon, Tron, Bitcoin, Solana).	
Nigson Group CONTRACT	Feb – Aug 2025
Sole backend engineer for a high-throughput e-commerce platform in Node.js & Go for Nigeria's largest electronics distributor — 90%+ payment success rate via Paystack & Flutterwave.	
DryveHub PROJECT LEAD	Dec 2023 – Apr 2025
Directed a 3-person backend team within an 8-person squad — 99.8% uptime, <200ms p99. Moniepoint integration cut payment time 80%; real-time tracking lifted engagement 35%.	
Agbero OSS CONTRIBUTOR	Jun – Dec 2024
Early contributor to a production Go reverse proxy & load balancer — 11 LB strategies, gossip clustering, JWT/OAuth/mTLS, WASM middleware. 5 releases.
